

SHINY RIDES CAR DETAILING

# CERAMIC COATING

*“shine and protect”*

## What is Ceramic Coating?

If you have ever purchased a new car, you may have been offered to purchase *Paint Protection* from the dealership. That Paint Protection is Ceramic Coating.

Ceramic Coating is an advanced, semi-permanent hardened sealant that bonds directly with your car's clear coat, creating a durable shield that defends against water, dirt, and environmental contaminants. It's also designed to protect your paint from harmful UV rays, which can cause fading and damage over time.

It also delivers a stunning, long-lasting shine that makes your vehicle look as good as new. Maintenance washes become easier as dirt and water simply slide off the surface, keeping your car cleaner for longer and reducing the time spent on upkeep.

Unlike traditional waxes that last weeks or months, Ceramic Coating lasts 3-5 years, offering exceptional durability and much stronger protective qualities.

For optimal results, we recommend applying Ceramic Coating when the vehicle is brand new to ensure the paint is in peak condition.

Older vehicles will require additional paint correction, which will be reflected in the pricing.

## Whats Involved?

1. **'Deep Exterior Detail'** service
2. **Paint Decontamination**- Thorough cleaning to remove contaminants from the surface using clay bar or decontamination towel
3. **Paint Correction**- A cutting and polishing process to reduce imperfections and enhance shine. The extent of correction required will depend on the vehicle's age and condition.
4. **Final Paint Preparation**- A final cleanse to remove any residual products, ensuring a smooth surface.
5. **Ceramic Coating Application**- Application of the ceramic coating to all painted surfaces
6. **Bonding Time**- Vehicle will need to be kept in the garage for 12 hours after application to ensure safe bonding. If you dont have a garage we can hold onto your vehicle overnight for you.
7. **Aftercare**- You can drive and store your vehicle as normal following the 12 hour curing time. We will hand you a takeaway pamphlet that talks you through all of the aftercare information including how to wash your car and when it is safe to do so.

**We will require your car for a full day. Older cars that require extra paint correction and enhancement, may require up to 2 days.**
