

SHINY RIDES CAR DETAILING

# CUT AND POLISH

*“bring back that shine”*

## Do I need a Cut and Polish?

If your vehicle's paintwork is showing signs of wear, including swirl marks, light scratches, or a dull appearance, our **Cut and Polish** service is the ideal solution to restore its original shine and smoothness.

Over time, factors like sun exposure, improper cleaning techniques, everyday wear and tear, and a lack of protective sealants can cause your car's paint to lose its luster. We work to effectively address these imperfections and bring back its gloss.

Since each car is unique, we recommend an inspection prior to the service. Our priority is to preserve your car's clear coat above all else, so we will give you honest recommendations on how to achieve a great outcome safely.

## Whats Involved?

1. **'Deep Exterior Detail'** service
2. **Paint Decontamination**- Thorough cleaning using a clay bar to remove any remaining contaminants from the paint's surface.
3. **Paint Correction**- A cutting and polishing process using polishers and compounds to reduce imperfections and enhance shine. The extent of correction required will depend on the vehicle's age and condition.
4. **Paint Sealant**- Application of spray sealant for shine and protection

OR

Talk to us about adding Ceramic Coating while your paint is in peak condition.

**This is a full day service and costs vary depending on the condition of your paintwork.**
